## Jarrow District

Mrs. Grove and daughter Marjorie, Mrs. Saul, Mrs. Luxton and Mrs. H. Doherty motored to Edmonton, on Wednesday and returned Friday afternoon.

Mr. and Mrs. J. H. H. of Beaver lodge spent the week end with Mr. and Mrs. Grove.

Mr. and Mrs. P. Lindquist and baby Corinne of Viking are spending a month here, with relatives and friends.

Mr. A. Firkus received the sad news on Monday of the death of his brother Ray Firkus in California. Mr. Firkus left Monday evening for Wisconsin, the home of his parents to be present at the funeral which will be held there.

The Ladies Aid concert held on Saturday evening in the hall was one of the best ever held here. In spite of bad weather and roads a large crowd was present and each item was enjoyed by all. Mr. Robinson, a visitor in the district entertained with comic songs and Hawaiian music. Mr. A. Christensen on the cornet, Elvin on the banjo and Avis at the piano, gave some most enjoyable instrumentals. The school children trained by Mrs. Taylor and Mrs. Williams, gave several songs and a fairy drill. The Moore children, Hazel and John, gave an excellent demonstration of club swinging. Miss Williams of Lamont, Mr. Kerns and Thelma and Harry Miller of Kinsella all gave most enjoyable items and readings were given by Mrs. Waite, Mrs. Geo. Therou and Mrs. Luxton.

The entertainers all gathered at the manse after the program and a social hour and lunch followed provided by the members of the Aid.

On Tuesday evening a large crowd gathered in the hall for the Community Club meeting. After the business the meeting was turned over to the young people and an impromptu program was given. During the evening a beautiful steamer trunk was presented to Mr. and Mrs. Luxton, who have been officers of the club since it was first organized and who are leaving at the end of the month. A dainty lunch was served and the singing of the national anthem brought an enjoyable evening to a close.

Mr. and Mrs. Williams and daughter of Lamont, visited Mr. and Mrs. E. Williams here for the week end. Mrs. Orr and Mrs. Peet spent Monday visiting friends in Hardisty. The Jarrow restaurant is now open for business under the efficient management of Mr. and Mrs. W. Lindquist.

Mr. and Mrs. Boyd of Holden spent Sunday in town visiting their son and family here.

The Alberta Pacific elevator is closing on June 1st. Mr. Orr who has been their buyer for several years is staying in town for the present. Denzil Morgan who had his arm broken while cranking a car, is around again and improving all the time. Miss Bernice Tweedy spent the week end visiting Mr. and Mrs. G. Saul south of town.

Mr. and Mrs. Luxton are having a sale of their household effects on Saturday afternoon, May 28th.

Division 1, Cd.

Moved by Mr. Blackley that Frank Weiss be appointed Road foreman for Division 2, Cd.

Moved by Mr. Smallwood that P. J. Harvey and H. Kasten be appointed Road foreman for Division 3, Cd.

Moved by Mr. Burton that Clark Steel be appointed Road foreman for Division 5, Cd.

Moved by Mr. Vesey that Wm. Milford be appointed Road foreman for Div. 6, Cd.

Moved by Mr. Burton that Council adjourn. Cd.

Chas. Wilbraham, Sec-Treas.  
M. D. Battle River No. 423  
Irma, Alta.

**MUNICIPAL HAIL INSURANCE**

Application forms for Municipal Hail Insurance are now available and can be had from the Secretaries Office any purchaser of land can insure against hail and the premiums collected entered as taxes.

Chas. Wilbraham, Sec-Treas.  
M. D. Battle River, Irma, Alta.

An afternoon tea and sale of home cooking will be held at the home of Mrs. Pryce Jones on May 28th from 3 to 5.30.

## Fatal Accident

ACCIDENT ON SUNDAY,  
MAY 8th, PROVED FATAL

Miss Lulu Terrin while horseback riding on Sunday, May 8th was thrown from her horse and seriously injured. She was rushed to Wainwright hospital in an unconscious condition. It was found that she suffered concussion of the brain from which she never regained consciousness, and passed away on Wednesday, May 11th. The Terrin family came to this community last summer. The mother and several sisters and brothers are left to mourn her loss. The funeral was held at Irma and burial was in the Irma Cemetery.

The late Miss Terrin was in her teens and was very much esteemed by those who had made her acquaintance in the short while they have resided here. She was very fond of horse back riding and a very good rider, but an animal unexpectedly crossed in front of her horse which caused the fatal accident.

## Maloney Coming

MR. J. J. MALONEY  
TO SPEAK AT IRMA  
THURSDAY, MAY 25th

Mr. J. J. Maloney will speak twice at Irma on Thursday, May 25th.

The address will be 3 p.m. in the afternoon will be for ladies only, and the meeting in the evening for men only. Do not miss this opportunity of hearing one of Canada's finest speakers.

## Avondale.

Avondale O. F. W. A. will meet with Mrs. Taylor, May 19th, all members are requested to come dressed to represent a book or a song, a prize being given for the best representation.

Avondale Jr. U.F.A. are holding a dance at Avondale school on May 27. Coulman's orchestra have been secured to furnish music. Everyone come and bring your friends and have another good time at Avondale school.

Several people from Avondale are contemplating a week's outing at Cold Lake. If enough passengers wish to go Mr. Ford and sons will take a car and truck load for a nominal fee each passenger. If you are wanting a week's holiday get in touch with Mr. Ford in Avondale district for particulars.

Mrs. Goodwin has been on the sick list the past week.

Mrs. Shotts is a cold and flu patient this week.

Mrs. J. McCready was ill the first part of last week with a bad cold which later developed into congestion of the right lung and pleurisy. Dr. Wallace was called and found it necessary to take her to the Wainwright hospital for treatment. Mr. and Mrs. E. Prior and Mr. McCready motored to Wainwright on Sunday to visit her and found her much improved although very weak.

Mrs. Cooper returned from Edmonton where she had been visiting Mr. Cooper who is a patient at the University hospital.

Mr. and Mrs. J. Fletcher and Jackie; Mrs. Marjorie Arnold, Edith Stella and Edna; Mr. and Mrs. Wm. Dalton and baby Dorothy, and Mr. and Mrs. Gordon Whiteley were visiting with Mr. Wm. New and Mr. and Mrs. S. M. New on Sunday.

Mr. and Mrs. J. Allen and Lizzy Cooper visited at the home of Mrs. Mildred Chase on Sunday.

S. M. New hauled a car of oats last week.

**W. A. BRANCH ORGANIZED**

The Ladies of the District south of Jarrow met with W. A. representatives from Wainwright and Irma on Tuesday, May 17th and organized a W. A. branch in their district. They already have nine members and are looking forward to a series of interesting meetings. Mrs. Conely, Sr. was chosen for president, and Mrs. R. T. Meakin, Sec-Treas.

## CHURCH NOTICES AND ACTIVITIES

**UNITED CHURCH NOTES**

The services next Sunday will be held at Paschenedale, Roseberry and Irma at the usual hours. Preparations are being made for a Reception Service and the Sermon Topic will be "Climbing Life's High Way". A special invitation is given to all young people to attend this service. The Annual Conference will be held in Edmonton next week and the pastor will be away on Sunday, May 29, but there will be services both in town and country. The service in town will be in charge of the Young People's Society. Watch for further particulars.

**IRMA ANGLICAN CHURCH NOTES**

An Anglican Service will be held in the United Church at 3 p.m. Sunday, May 22nd. The next W. A. meeting will be at the home of Mrs. Geo. Batchelor, June 7th.

**LADIES AID LAWN SOCIAL**

The May meeting of the Ladies Aid was held at the home of Mrs. H. W. Love. The president, Mrs. Tripp, took charge of the meeting and a nice number of members were present. The committee reported real progress on the Manse, including the purchase of a new storm and screen door. Committees were formed and plans made for a Lawn Social to be held at the Smallwood home on the first day of June, supper will be served, besides the usual ice cream and eat. A good program of sports are being prepared so keep this date open and bring all your friends.

**C.G.I.T. PLAY AND PROGRAM**

On account of last Friday being such a wet night the C.G.I.T. girls have decided to repeat their program in Kiefer's Hall on Saturday night, May 28th.

Any tickets not used for the last night will be good for May 28th.

Those who saw the last program can promise you a real hearty laugh, as well as some fine musical numbers and readings. Admission 35c, 25c and 15c.

**Dates**

**DATES TO REMEMBER**

Mr. J. J. Maloney of Edmonton will speak in Kiefer's Hall on Thursday evening, May 26th.

The dentist, Dr. Murry of Mannville will be in Irma again on Friday, May 27th.

Don't forget the C.G.I.T. entertainment in Kiefer's Hall on Saturday evening, May 28th.

Then there is the Ladies Aid Lawn Social at the Smallwood home on Strawberry Plains on June 1st.

**Wainwright**

The alarm of fire on Tuesday morning, during the gale of wind which was blowing at the time, saw a quick rush of the fire ladders to the home of Mr. Alec Rustand on Dominion street about nine a.m. By some unexplained means fire had started on the back-porch of the premises, and this was soon whipped into a dangerous blaze by the storm. After about half-an-hour's fighting with both chemical and hose streams the blaze was quelled, although the damage was quite considerable to both property and contents. Dr. Murry of Mannville will be in Irma again on Friday, May 27th.

A large number of our readers will be sorry to learn that arrangements are now complete for the Rev. A. Trendell, vicar of St. Thomas' to be inducted into the living at Wainwright. He is due to leave Wainwright about July 1st according to latest reports, and all will be truly sorry to see him go from this center, where he has endeared himself to all during his several years stay here.

The derrick property of the Ribstone Oils at McLaughlin which was recently destroyed by fire, is being rebuilt, and three five-ton-trucks loads of timbers went out from town last week for this business. Looked like old times to see this stuff moving.

No less than five carloads of Odd-fellows and Rebekahs motored to Irma on Sunday to join the Anniversary services being held there by the Irma lodges.

## WEEKLY REVIEW PROV. MARKETS

**BEEF**—Choice heavy steers \$4.50@ \$4.75; choice light \$4.75@ \$5.25; good \$4.50@ \$4.75; medium \$4@ \$4.25 and common \$2.50@ \$3.50. Choice heifers sold at \$4.50@ \$4.75; good kinds \$4.25 @ \$4.50.

**FEDERS, STOCKERS**—Feeder steers bringing \$3.25@ \$3.75; stock steers \$3@ \$3.50; stock heifers from \$2@ \$3.50 and stock cows \$2.25@ \$2.75.

**HOGS**—Edmonton quotation on bacon hogs, fed and watered was established at \$3.25, with selects making \$3.75 and the butchers \$2.75.

**GREENFEED**—Supply close to market centres practically cleaned up. Good demand. Price steady at \$8@ 9 per ton, delivered.

**\$221,471 SUITS**

**FILED AGAINST GAS COMPANY MONDAY**

One of the biggest claims in the history of the Alberta courts was filed this morning when North West Utilities was sued for \$221,471 for fire losses arising out of the disastrous fire at the Corona Hotel on February 21st last.

**LIGHTNING PREDICTED**

Canadian weather experts predict for 1932 an unusually high number of lightning storms under such dry conditions as invite forest fires. This means that forest fire rangers, greatly reduced in numbers during 1932, will have to depend more than ever upon the public for active aid in reporting and subduing outbreaks. With the handful of rangers that will be on duty in many areas, the Canadian Forestry Association is doing its utmost to persuade settlers, tourists, campers and other classes to show special vigilance and to take every precaution against causing fire trouble in the woods.

**C. N. R. HOLIDAY RATES**

The longest weekend holiday of the year, Victoria Day, May 24th, falls this year on a Tuesday and furnishes the opportunity for the railways of Canada to render an outstanding service. Between all points in Canada and some specified places in the United States, return fares for the holiday will be at the rate of one and one-quarter times the one-way first class fare. Similar concessions will also be given by the railways for the holidays on King's Birthday, June 3rd, and Dominion Day, July 1st. Reduced fare tickets for the Victoria Day holiday will be on sale from noon, Friday, May 20th, until noon, Tuesday, May 24th. The return limit of these fares will be midnight Wednesday, May 25th.

**C. N. R. TIME TABLE**

No. 1 leaves Irma 6:27 A.M. and arrives in Edmonton at 10:10 A.M.

No. 2 leaves Edmonton 5:15 P.M. and arrives at Irma at 8:36 P.M.

Take advantage of the Low Week End rates, Saturday morning till Monday evening, \$4.75 return to Edmonton.

—J. R. Whyte, Agent.

**PACKAGE BEES**

Bees will commence arriving about the 20th of April. It is important that all farmers wishing packages of bees this spring place their order immediately. Remember the earlier you get your bees started the better chance you will have of getting a good crop of honey.

**GET YOUR SHOES AND HARNESSES REPAIRED BY**

"Fresh from the Gardens"

## The Past, The Present and The Future.

Poets have written of "The past I leave behind"; men of affairs have stated the same thing; wayfaring youth promising to reform have made such declarations; all of us have been exhorted to "let the dead past bury its dead."

But can the past ever be left wholly behind? Does it not always intrude into the present and even project itself into the future? Is not the present made up largely of the accumulated experiences of the past, and will not the future be moulded in the experience of today? All history proves that this is so.

Furthermore, even if it were possible to leave the past behind, to wipe the whole slate clean and begin all over again as if what has gone before had never been, would it be a wise course of action? In some respects, perhaps, yes; in other respects most decidedly, no.

The past, it is true, is now only of value for the experiences it has provided, for the lessons it has taught, for the accumulations of wisdom it has thus stored up for our guidance, for the advances that it has since prehistoric days. And it is because of these gains that it would be most unwise to completely blot out the past, even if we could.

Even the mistakes, the errors, the foolishness, the sins of the past should not be forgotten; they, too, have their value. They are the signposts along the road of the present, stretching on into the future, to warn us of dangers, to point out what to avoid.

But the past and its experiences, insofar as they resulted in discouragements and disappointments, weakening our wills, breaking our courage, lessening our initiative and energies, should be relegated to the limbo of the forgotten. They have no value, and constitute nothing but hampering drags now and throughout the days and years to come. They may well be wholly erased from our memories; left to the past to be forever buried by and in it.

And the present? It is our only opportunity. We may have a future, and we may not; no one can tell. But we have the present; it is now ours to use or abuse. And we have the past to guide us in the manner and method of its use. And the future, if we are accorded one, will largely be what we make it by the use, or abuse, we make of the present.

Down through the ages—our customs of life, our daily habits, our modes of thought and action, our institutions of government, our community existence, even our physical beings, have been developing and moulded to the forms of today. Man has profited by the lessons and experiences of the past, and he must continue in the present to profit, to learn, and to apply his learning to the problems of the present if his own future, and the future of his children and of the race, is to be better and brighter than is the present.

From the dark ages to the present, mankind and the world in which we live has progressed. At different stages progress has been achieved by great upheavals, by revolution, but it has been through the less spectacular, peaceful processes of evolution that the greatest upward strides have been made, those having the most far-reaching, most beneficial and lasting results for the betterment of all. This very fact, these experiences out of the past, have a lesson for the world of mankind today.

We have been suffering from a so-called business and economic depression. Times have been difficult and discouraging. Men and women in all countries and in all walks of life have been, and many still are, discouraged. Some are desperate, and talk revolution. But the past, if we will heed its warnings, teaches us that by revolution they suffered the most, whatever may have been the ultimately beneficial reforms which followed, while it has been by and through evolution that the greatest gains and blessings to the masses of the world's inhabitants have been secured.

In times like the present, men's views become distorted and their thinking unsound. They are not natural; it is, indeed, human nature. They are prepared to go to extremes in the present, without counting the cost of what the future will call upon them and their descendants to pay for the mistakes they may thereby make.

The present, therefore, is not a time for men to say: "The past I leave behind," except in the sense that they leave the errors and follies and unsound thinking of the past out of their reckoning and plans for the present and future. Rather it is a time to remember and closely study the past, the experiences of the past, and the results which flowed from those experiences, with a view and a determination to profit thereby, rejecting what time and experience has proven to be bad, and incorporating, strengthening, those ideas and principles which have revealed their soundness into the warp and woof of the future.

## A Really New Idea

Woman Eighty-Two, Has Plan To Salvage Old Age

Dr. Lillian Jane Martin, consulting psychologist of San Francisco, who has spent more than half a century as an educator and will celebrate her eighty-second birthday in July, arrived at New York the other day fresh and active after driving her own car across the continent and lecturing in the large cities along the way. "I am here," she announced, "to present the whole matter of salvaging old age. For example, the weakness of being too slow. Many old people started life when the tempo of society was much slower than it is today. And so they must be speeded up to modern conditions. Both physical and mental exercises can be given them up to the speed of whatever industry they are in."

Small automobiles are becoming popular in British Malaya.

## Her Heart Was So Bad Couldn't Do Housework

Mrs. S. Dragoman, R.R. 2, Midland, Ont., writes—"I had been troubled with heart trouble for many years. My heart would beat so fast I could hardly breathe, and I had headaches, and dizzy and fainting spells."

I couldn't get my housework done I was so weak. I took three boxes of Milburn's Heart and Nerve Pills and felt much better, and now I would not be without them in the house."

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

## A Promising Sign

Many New Manufacturing Industries Are Starting in Britain

Students of the British industrial situation are pointing out that the returns from the Patent Office indicate an increased tendency to protect in Great Britain the production of commodities which heretofore have been largely supplied from foreign countries.

It is of great interest to note, in this connection, that there have been many applications for patents for silk manufacture, hitherto largely controlled by France; for laundry machines, up to now regarded as an exclusive American monopoly; and for dye and alloy manufactures, of which Germany has been the principal originator in the past.

In all these varying fields, new industries have sprung up in the Old Country, and so far as dyes and alloys are concerned, the manufacture is now predominantly British, while silks and other products are being manufactured in Britain in ever-increasing volume. At a time when business is supposed to be going to the bow-woos, surely this is a promising sign.

## Where Butter Is Dear

Russian Housewives Have To Pay \$3.60 Per Pound

Long queues of women are forming daily in Moscow again because of the serious shortage of butter, milk, eggs and sugar. After a year in which these lines of waiting housewives had been almost eliminated, they have been brought back to the doors of the so-called commercial stores by the thousands. The commercial shops are government-owned, but are distinct from the ordinary rationed government shops, from which dairy products have virtually disappeared. The commercial shops sell goods at much higher prices and without food books. Butter sells at about 7.29 rubles (nominally \$3.60) a pound and despite the price, there is usually a race to the shops as soon as news of receipt of new supplies is circulated.

## Acids In Stomach Cause Indigestion

Create Sourness, Gases, Pain, How To Treat.

Medical authorities state that nearly nine-tenths of the cases of stomach trouble, indigestion, sourness, burning gas, heartburn, nausea, flatulence, etc., are caused by the presence of acids in the stomach. The delicate stomach lining is irritated, digestion is delayed and food sour, causing the disagreeable symptoms which so many stomach sufferers know so well.

Artificially made acids are not needed in such cases and may do real harm. Instead get from any druggist some Eucalyptol, which is a natural and safe, powerful powder or four tablets in water. This sweetens the stomach, prevents the formation of excess acids, and thus cures sourness, gas or pain. Blaud's Magnesia (in powder or tablet form—never liquid) is harmless to the stomach, inexpensive to take and is the most efficient form of magnesia for stomach purposes. It is used by thousands of people who enjoy their meals with no more fear of indigestion.

## Wheat Export

Prospects Are Seen For A Better Export Movement In Near Future

Prospects of a better export movement of wheat, especially after July, when southern hemisphere wheat is exhausted, are forecast in the monthly report of the statistical department of the Board of Grain Commissioners on the movement of western Canadian crops in April. Freight rates have dropped to low levels on the Great Lakes with little business offering. There has been a noticeable demand for rye of late.

Miller's Worm Powders not only make the infantile system untenable for worms, but by their action on the stomach, liver and bowels they correct such troubles as lack of appetite, biliousness and other internal disorders that the worms create. Children thrive upon them and no matter what condition their worm-infested stomachs may be in, they will show improvement as soon as the treatment begins.

## No Wood Is Solid

The solidest and soundest kind of wood is not really solid at all. It is full of air—twenty to forty per cent of its total bulk consists of gases, trapped in the minute tubes and cell cavities that all wood is made of. This appears from the researches of Dr. D. T. MacDougal, of the Carnegie Institution of Washington, who reported them.

Nowadays people not only refuse to give credit where credit is due, but they won't give credit where cash is due either.

Paint spraying machines are just becoming popular in Bombay, India.

Ayr, Scotland, is to have public covered salt-water baths.

## LOST 30 lbs. FAT IN 3 MONTHS

AT THE AGE OF 40

"I was very stout, and I have taken Kruschen Salts for 3 months, and have reduced from 212 lbs. to 182 lbs. (age 40), a real hearty eater, and have never dieted in any way. Also I have never felt all effects whilst I have been taking Kruschen salts." T. H. That is an instance of Kruschen succeeding without assistance. But if any fat person will be satisfied with a moderate diet, and will take one half teaspoon of Kruschen Salts in a glass of hot water before breakfast every morning—they can lose fat in just the same way.

This is what Kruschen Salts does—it cleans out the impurities in your blood by keeping the bowels, kidneys and liver in splendid working shape, and fills you with a vigor and tireless energy you'd almost forgotten had existed—yet get the needed exercise. As a result, instead of planting yourself in an easy chair every free moment and letting fatty fat accumulate, you feel an urge for activity that keeps you moving around doing the things you've always wanted to do and needed to do to keep you in good condition.

## New Thieving Plan

Scotland Yard Looking For Gang Robbing Letter Boxes

A gang specializing in a combination of thieving and forging are occupying the attention of Scotland Yard. In search of letters containing checks, they fish in public and private letter-boxes, using typewriter as bait. Much of this work must prove futile, unless they have inside information or work at auspicious times, such as the first of the month.

Forgery of the purloined checks is a specialized job, which can be detected only by the use of ultra-violet rays and the aid of a handwriting expert. The gang's methods are so characterizedly clever that they offer to Scotland Yard a ready means of identifying their handiwork.

If Edgar Wallace were still alive, a new book or play featuring these novel exploits might be expected in a few weeks—or even days.

## Radio In Dummy Funnel

This Innovation Will Be Seen On New British Liner

A dummy funnel will be used to house the wireless equipment of the White Star liner "Georgic," which is rapidly nearing completion at Belfast. The aerial and direction finder both will be inside the giant funnel, and thus screened effectively from local electrical disturbances. The top of the funnel will be open, and with the aerial fitted to the roof of a cabin below, it will be possible to obtain uninterrupted wireless signals for direction finding. The screening will be so complete, in fact, that the usual work of eliminating electrical interference from the ship's motors will be unnecessary.

Like her sister ship the "Britannic," the "Georgic" will have two huge elliptical funnels, but as she's a motor vessel, only one is needed as an exhaust and ventilator.

Asthma Is Torture. No one who has had a fit of asthma knows what suffering is. Thousands do know, however, from experience how immeasurable is the relief provided by that marvelous preparation, Dr. J. D. Kellogg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

## Paid Taxes With Coppers

Indiana Man Had Over Thirteen Thousand In Chest

David Johnson and a companion attracted the eye of a policeman when they hoisted a tool chest to the top step at the city hall, then sat back exhausted.

"Where are you going with that box?" asked the officer. "Going to pay my taxes," replied Johnson. He opened the chest, took out 13,700 pennies and got a receipt for his \$137 assessment.

The North Pole is not by any means "the coldest thing in the universe." Liquid hydrogen has a temperature of 422 degrees below zero.

## Teething

"Baby's Own Tablets take away that teething fever," writes Mrs. Alfred Bungay, North Sydney, N.S. Effective also in relieving colds, fever, colic, upset stomach, constipation. Children like them. Absolutely SAFE. —See analyst's certificate in each 25c package. 231 Dr. Williams' BABY'S OWN TABLETS

W. N. U. 1942

## Trapper Meets Tragic End

Perishes From Cold In Shack In Northern Woods As Result Of Accident

Solution of a five-month mystery and the end of a Royal Canadian Mounted Police search came recently with the arrival at The Pas of a Mountie patrol under Constable W. Barret, bringing the body of Oscar Morrell, missing trapper, from one of his trapline shacks 34 miles east of Mile 374 on the Hudson Bay Railway lines.

Morrell left Mile 374 on Christmas Eve last, planning to be gone two weeks on a hunting trip. It is believed while covering his trapline he accidentally discharged his rifle and blew off his right hand. Driving his team of dogs, he staggered through the snow to one of his trap-line shacks, where he made a rude and futile effort to stop the flow of blood from his injured arm. As he weakened rapidly he built up the fire in the shack to keep out the freezing winds, using chairs, part of his bed, and even his snow-shoes in his effort to keep warm.

When friends here became alarmed at his long absence, a detachment of Mounties set out to search for him, and broke into his shack to find his body in the grim setting of his lonely struggle against death. His body was brought to The Pas for identification and burial. He is believed to have lived in Winnipeg and Saskatoon before coming north to trap.

## New R.C.M.P. Appointment

Inspector T. V. Sandys Named Successor To Inspector Joy

A member of the Royal Canadian Mounted Police for more than a score of years, Inspector T. V. Sandys, Winnipeg, who is now stationed at Cranbrook, B.C., was announced recently by Major-General J. H. MacBrien, commissioner of the R.C.M.P. He succeeds Inspector A. H. Joy, famous Arctic officer, who died at Ottawa, April 29. The new inspector of the Western Area will have his headquarters in Montreal.

Inspector Wunsch will visit his far northern posts this summer, leaving for the Arctic, July 9, aboard the Hudson's Bay Company vessel "Un-gava."

## Isabella Horses Are Scarce

Special Breed Can Be Obtained Only In Germany

Isabella horses are being sought in Germany by Captain Hopkins, regarded as one of the best judges of horses in India, at the behest of a Maharajah. They are a special breed with brownish yellow coats and white manes and tails. They are wanted to draw the Maharajah's state coaches. Horses of this type used to be bred throughout Europe by various princes, the studs of the Kings of Hanover in Herrenhausen, being specially noted for them, but now so far as is known they are only bred by one private dealer in Germany.

## Flivver Derails Freight Train

Knocks Eight Freight Cars Off The Track at Level Crossing

They tell of a mouse falling into a rum barrel and crawling out crying for lions to fight.

Recently at a level crossing near Gravenhurst, Ont., a "flivver" sidwiped a Canadian National Railway freight train and derailed eight cars. It charged screeching and died screaming, a total wreck, but in its death agonies it guarded its owner-driver, T. E. Callon, Orillia, and another passenger, McCallachern, both of whom escaped with minor bruises. None of the train crew was injured.

Why suffer needlessly! Douglas's Egyptian Liniment brings quick, sure relief to scald feet, sore corns and warts. Relieves inflammation. Removes proud flesh.

## Got His Money's Worth

Two men attended a village church tea for which the tickets were a shilling each. The profits were to go toward providing comforts for the aged poor of the village.

Brown, after accounting for four cups of tea, a dozen sandwiches, three plates of bread and butter, five jam tarts and four buns, was passing his cup for the fifth time, when he turned to his companion, who was also doing well, and said, "I think everyone should encourage a thing of this sort—it's such a good cause."

King George's new six-months-old terrier refuses to recognize anyone at Buckingham Palace except the king.

The foreign-born amongst us flock to art museums and seem to enjoy them.

The two-family car seems to have supplanted the two-car family.

Thousands of MOTHERS ARE GRATEFUL

"... I wish I had known about this when I raised my first baby. So many mothers tell us. Real, crying babies make mothers grow old. Our new Baby Welfare book tells how to keep your baby laughing and well-joyed rather than a care. Write today and it will be mailed to you free."

The Borden Co., Limited, 115 George St., Toronto, Ont. Gentlemen: Please send me free copy of booklet entitled "Baby Welfare."

## Considering Plans For Railroad Across Sahara

Low Building Cost Great Incentive To French Deputies

The depression sometimes has curious and conflicting effects. From South America comes the report that it has led to the closing of the famous railroad over the Andes which links Argentina and Chile; from France dispatches relate that it has led to a definite and practical revival of the project for a railroad across the Sahara. If in the one case decreased traffic has made further operation unprofitable, in the other reduced costs of building material and a plentiful supply of labor are advanced as reasons which make this an especially propitious time for construction. The Sahara project is a gigantic undertaking which demands for its success the economic exploitation of a vast area of land which is now virtually useless. The cost of the railroad itself, entirely apart from the scheme for developing vast irrigation works in the Sahara to be fed by a canal from the Mediterranean, is put at \$100,000,000. That an influential group of French Deputies is even considering a Saharan railroad at a time like this is striking evidence that in France at least they apparently do not believe the world is coming to an end. We hope that if news of the closing of the two-mile-high line over the Andes reaches Paris, it will not discourage these promoters of what would probably be the world's lowest and fattest railroad.

Persian Balm—the one toilet requisite for the dainty woman. Delightful to use. Leaves no stickiness. Swiftly absorbed by the tissues. Delicately fragrant. Imparts a velvety loveliness to the complexion. Tones up the skin. Softens and banishes all unpleasant roughness or chafing caused by wind and other weather conditions. Makes hands soft and white. Creates an elusive, essentially feminine charm. Persian Balm is indispensable to women of refinement.

## Problem For United States

In little more than twelve months nearly 400 persons have been kidnapped in the United States, mostly for ransom, which frequently has been forthcoming. Some of the victims are from up comparatively humble homes, which shows that the criminals are extending their field. The crime is reaching the dimensions of a national problem.

## Growing Their Own

Gardeners in Iceland are using the hot springs for horticultural purposes with some good results that they claim that Iceland need import no more foreign vegetables—they can grow sufficient to supply the whole island. The islanders are starting a campaign with the slogan: "Buy Icelandic."

Iron and steel plants in Japan are showing increasing activity.

## Economic Organization Within The British Empire Is Urged For Boosting Inter-Empire Trade

Formation of a permanent economic organization within the British Empire and elimination of party politics from imperial trade conferences were urged by Hon. Frank Carrel, prominent Quebec publisher, as steps toward restoring inter-empire trade. The proposed permanent economic organization should be similar to the League of Nations, Mr. Carrel said in his address to the Canadian Club and Calgary Board of Trade members.

The speaker believed one important result of the coming Ottawa Imperial conference would be the organization of such an economic body as he suggested. This body would "technically, scientifically, and economically find the solution to many problems now engrossing all the peoples of the empire."

Prominent Englishmen were rapidly becoming converted to the idea, he continued, and sympathy was growing stronger throughout the empire. Mr. Carrel's plan also included an empire educational campaign through the press, platform and radio; founding of an empire commercial university, assistance in the promotion of British branch factories; co-ordination of trade agencies and consular services; construction of empire warehouses in leading industrial centres, possibly by creation of free ports; interchange of business data throughout the empire; uniform cable codes and, finally, effecting favorable treaties with world trading states.

### Great Bear Lake Minerals

Many Claims Have Already Been Staked and Great Activity Shown

According to reports reaching Ottawa, a great many mineral claims have already been staked in the area adjacent to Great Bear Lake, North West Territories, and there is every likelihood that many more will be staked this summer. Some prospectors have already gone in by airplane and others are planning to go in by water transport as soon as the ice goes out. In view of this great activity the Topographical Survey, Department of the Interior, Ottawa, has reprinted the manual respecting the survey of mineral claims in Dominion Lands for the use of Dominion land surveyors who may be called upon to make official surveys of these claims.

### U.S. Wheat Exports

Made International Gain in March Over Recent Months

Wheat exports of the United States made a substantial gain in March over recent months. The index was 79, as compared with 73 in February and 74 in January. A year ago it was 53. All other export groups, however, fell off sharply.

All principal European countries except Italy took more wheat in March than a year ago. Total exports thus far this season amounted to 106,998,000 bushels against 102,309,000 a year ago.

### Development Of Aerial Photography

Notable progress has been made in Canada in the employment of oblique and vertical aerial photography for mapping some of the little known parts of the Dominion. The Topographical Survey Branch of the Department of the Interior, is the central clearing house for aerial photography in Canada, over 560,000 photographs being on file in that branch to date.

"Are you going to take this lying down?" boomed the candidate. "Of course not," said a voice from the rear of the hall, the shorthand reporters are doing that."

"When is high tide, captain?" "At 5:55 p.m. But I have told you twice already." "But your chin waggles so comically when you say 5:55," Hummel, Hamburg.

W. N. U. 1942

### Criticism For Food Fads

Three Factors Determined Proper Diet Opinion Of Expert

Magazine and newspaper advertisements which state that certain food products are indispensable to the human diet came in for stiff criticism from Dr. J. M. Rabinowitch, assistant professor of medicine at McGill University, and director of the department of metabolism at the General Hospital, in an address to members of the Montreal Canadian Club recently. Three factors alone determined the diet of man and these, he said, were the food available, his ability to secure such food and the food's taste, digestibility and richness of nutrient matter.

According to orange growers, he said, half the world had acidosis and the other half were about to have it and for these they urged the use of orange juice in the diet.

"Life insurance firms who examine applicants for policies do not ask these people if they drink coffee," he said after quoting an advertisement predicting the alleged horrible fate of coffee-drinkers by the manufacturers of a non-caffeine beverage.

"We are urged to consume huge quantities of milk if we wish to be healthy," he continued, "but with all mammals, the young receive milk from the female parent for a definite period and no longer." In some parts of the world, he pointed out, "milk is a rarity, yet people who live there do not die off like flies."

**SMALL DAUGHTER FOLLOWS SUIT IN GUMMIE DRESS**  
MUMMY IS WEARING  
Add this new gummie dress to small daughter's wardrobe—both you and she will love it!  
The clever design of this model has taken yellow swiss with white dots for the blouse. Plain linen in French blue made the skirt and suspender straps. It's a most pleasing combination.

Of course all sorts of attractive summery materials could be used for this cunning model. Tomato-red pique with white dimity with tiny pin red dots is very effective. Navy blue sheer wool with the gumps of red and white checked gingham is quaint and extremely fashionable.  
Style No. 434 is designed for sizes 6, 8, 10 and 12 years. Size 10 requires 1 1/2 yards of 35-inch material for blouse and 1 1/2 yards of 39-inch material for skirt and trim.  
Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Four new minerals have been added to the list of materials of which the earth's crust is made.

### Bees Are Preparing For Season's Work

Abundant Food and Protection From Cold Essential To Strong Colonies

During the winter months there is little or no activity within a bee colony, for during the cold weather the only matter of concern to the bees is to secure enough food and to keep warm.

Sometime last fall the queen ceased her egg-laying, and as the combs became empty of brood they were filled with food for the winter. As the weather became cold the bees gradually clustered closer and closer around their queen until finally a fairly compact cluster was formed, and, except during an occasional spell of warm weather, this cluster may remain unbroken for a period of five or six months.

During the winter, the cluster moves about within the hive, at all times keeping in contact with the food supply. Towards spring an unknown something will inform the bees that summertime is again on its way and the cluster will gradually loosen and expand and in the centre of the cluster the queen will again resume her work of egg laying. Only a few eggs are laid at the start, but as the days lengthen and the sun becomes stronger, the number gradually increases until as high as 2,500 may be deposited daily.

In outdoor wintered colonies, egg-laying usually commences some time during the month of March, depending greatly upon the weather. In some localities such activity may be resumed even earlier. Cellular wintered bees do not usually start so early as outdoor wintered bees, except under abnormal conditions. This early egg-laying is of great importance to the beekeeper, for it is the eggs laid during the spring and early summer that will produce the bees to gather the honey harvest. The larger the force of field bees at the commencement of the harvest, the greater will be the crop, and it follows that the greater the number of eggs laid during the early part of the season, the larger will be the field force. To get the maximum number of eggs laid, three things are necessary. A vigorous and prolific queen; an abundant food supply, and adequate protection from cold and changeable weather. Neglect to supply any one of the three will result either in starvation and death of the colonies or in colonies that are too weak in bees to gather a surplus of nectar when the honey flow is on.

### Another Step Forward

Short Cut In Method Of Cancer Diagnosis Found

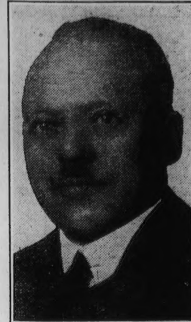

A short cut in cancer diagnosis promising more hope for the most malignant cases was shown to the American Medical Association at New Orleans.

This new method enables an expert with a microscope to see at almost one glance whether a cancer can be benefited by radium. About one-third of all cancers are helped by radium while the other two-thirds are not.

The very malignant growths fall largely in the radium class and as they are the fastest spreading, the time saved in diagnosis is also life saving.

Telegraph wires in East Africa have to be carried on exceptionally high poles owing to the liability of giraffes breaking the cables.

### PROMOTED

L. A. B. Hutton, newly appointed superintendent of the Department of Communications, Algoma district, of the Canadian Pacific Railway. Mr. Hutton was inspector of telegraphs, as the department was formerly called, at Calgary, until the fall of 1931, when he was transferred to Winnipeg in the same capacity. His headquarters are now at Sudbury, Ontario.

### Plants Valuable In Detecting Gas Leaks

Suggested As Safety Precaution For Crews Of Submarine

Crews of submarines may in future carry potted tomato plants with them, as sailors on bigger ships have parrots and goats.

But these green mascots will not be merely pets; like everything else in the crowded interior of a "sub," they will have to pay their way. And they can do it by giving warning of gas leaks, long before even that most sensitive of animal detectives, the canary, could detect them.

This is one of the possible uses for the peculiar behaviour of plants in the presence of ethylene gas that was suggested by Dr. William Crocker of the Boyce Thompson Institute for Plant Research, speaking at one of the closing sessions of the American Philosophical Society's meeting at Philadelphia.

The value of many plants for this purpose depends on the curious behaviour of their petioles or leaf-stems in the presence of very dilute quantities of ethylene gas, a common ingredient of illuminating gas and almost invariably present with carbon monoxide.

Dilutions of ethylene as low as one part in ten million of air will cause tomato leaf stems to begin growing on the upper side where they did not grow before, thus causing them to bend downward instead of up. This effect was first demonstrated several years ago by Sarah L. Doubt, and has since been the subject of much research by Dr. Crocker and other plant physiologists.

Curiously, if a potted plant is turned upside down and then exposed to ethylene it does not react. The reason is that the ethylene anesthetizes the plant, destroying its response to the pull of gravity.

The oldest oak forest in Europe is standing in Oldenburg, North Germany. The trees date back to the Middle Ages.

## Report Of Committee Favors A Nationally-Owned Radio Broadcasting System For Canada

### Schools Need Freedom

England Taking Advantage Of New Idea Of Education

English education is very much alive. There are still dull patches in it, of course; but, go where you will, you are never far from a school which is showing strong power of adaptation to the new needs of the community. Three times before in history English education has flushed with renewed energy; first under Alfred, next at the time of the Reformation, and last in the early days of Queen Victoria. But never till now has it been free from the cramping influences of poverty. Today it is well furnished and free in its choice of methods of work. The teachers are at liberty to try new ways of teaching; to get into the open air; to use other tools than the pen. A school needs space, zest and freedom if it is rightly to train those who a few years hence will make or mar the tone and temper of town and village, of factory, shop and farm. Not all the schools have yet made full use of their new opportunities. But England is now dotted over with good examples of the new education.

### Seed Oats From Alberta

Further Supply Has Been Ordered For Saskatchewan Areas

Further shipments of seed oats will be made from Alberta to the drought-stricken areas of Saskatchewan, according to G. M. Stewart, district inspector of the Dominion seed branch in Calgary.

Some time ago one million bushels of seed oats were shipped from the Peace River area to Saskatchewan. The further shipments will be made from other parts of Alberta only as the surplus supply of seed oats in the Peace River country has been used.

Mr. Stewart said a request has been received from Saskatchewan authorities for additional supplies of seed oats. The previous shipments having been insufficient.

### Will Not Need Fire

Civilization Of Future Will No Doubt Have Substitute

The prediction that fire, which has played so strategic and friendly a role in man's progress, will be needless in future civilization was made by Dr. Walter Hough, chief curator of anthropology of the U.S. National Museum. Dr. Hough based his prophecy that we shall become independent of fire upon the ground that other natural forces will be utilized. The germ of this future phase of civilization is already developing in modern invention, Dr. Hough said.

### Record For Inventions

The Wall Street Journal says: "Depression, as well as necessity, may lay claim to being the parent of invention, for within the last six months the number of inventions patented or awaiting patent papers is greater than in any similar period on record in this country. It seems that unemployed men are using their enforced leisure to perfect mechanical devices of all sorts."

Canada will have a nationally-owned radio broadcasting system if the report tabled in the House of Commons is implemented by parliament.

Highlights of the report are: Establishment of a chain of high-power national stations located at suitable intervals across Canada, their exact position to be determined after a careful technical survey.

Appointment of a federal commission of three, with assistant commissioners for each province, "to carry on the business of broadcasting."

Establishment of trans-Canada chain broadcasting as "one of the first duties" of the commission.

Advertising to be limited to not more than five per cent. of each program period.

Location, where required and under private ownership if desired, of as many stations of 100 watts or under as may be deemed necessary for complete coverage.

All revenues from license fees and advertising to be expended in the interests of radio, and license fees to be fixed by the governor-in-council.

The report, which was brief and left the working out of details to the commission, pays tribute to the present radio broadcasting stations in the following words:

"They entered as pioneers in a field of service in the art of radio and, under trying handicaps and sacrifices, worthily kept pace with a science fraught with ever-changing improvements and developments, and rendered this service under handicaps, which is most praiseworthy."

The commission expressed the belief, however, "that the present system, excellent as it is in certain respects, does not meet the requirements in quality and scope of broadcasting to insure its maximum benefits."

The report, presented by Hon. Dr. Raymond Morand (Cons., Essex East), bears the endorsement of the entire committee of nine members.

### Great Spread In Prices

Varying Cost Of Foodstuffs In U.S. Is Puzzling

If we had some ham we could have some ham and eggs if we had seven cents if we lived in Texas.

The department of agriculture has discovered eggs are seven cents a dozen in Texas and 22.5 cents in Massachusetts.

It finds prices of foodstuffs vary throughout the country as much as 300 per cent.

Apples cost anywhere from 55 cents a bushel to \$1.85; chickens from nine cents a pound to 20.5 cents; farm prices of lambs range from 4.3 to seven cents a pound; sheep from 2.1 to 4.7 cents; calves from 3.9 to 8.4 cents; beef cattle from 2.6 to 5.5; wheat sells for 35 cents in Oklahoma and 84 cents in Georgia.

In some states the average prices for farm products are so low as to read like a price list of 1832.

### Saving Canada's Antelope

Interesting Chapter In The Story Of Wild Life Conservation

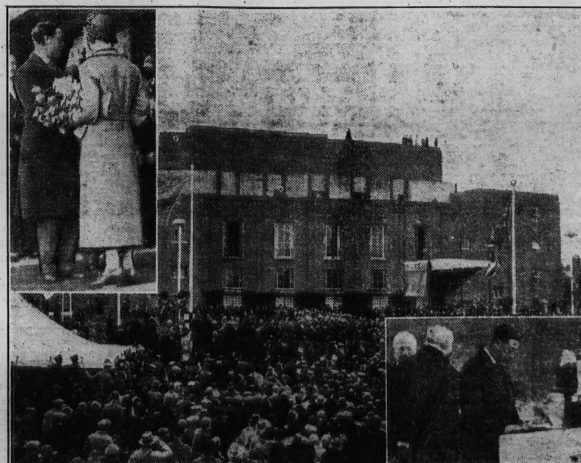

The history of Nemiskam National Park, Alberta, Canada, is an interesting chapter in the story of wild life conservation. Overcoming what appeared to be insurmountable difficulties, forty-two antelope were enclosed in a fenced-in area in southwestern Alberta in 1915, and, in contrast to previous experiments, continued to thrive in captivity. Their welfare and propagation, which at first was a matter of speculation, now seem to be definitely assured, as officials of the National Parks of Canada, Department of the Interior, report that the herd now totals 425.

Siberia is nearly twice as large in area as Canada.

"Master, I've found lion tracks in the north." "Good, let us go south immediately." Hummel, Hamburg.

### THE GREAT DAY AT STRATFORD-ON-AVON

These pictures gave a few glimpses of the ceremonies which marked the opening of the Shakespeare Memorial Theatre at Stratford-on-Avon. England's largest crowd gathered in front of the new theatre while (top left) the Prince of Wales is introduced to Miss Elizabeth Scott, the architect. Lower right, His Royal Highness can be seen making his speech at the opening of the Memorial Theatre.

# The Merchant is a Maker as well as a Publisher of "News"

## EVERY GOOD STORE IS A NEWS-CENTRE

A merchant's space in this newspaper is his own Newspaper, through which he publishes the things concerning his store which, in his view, constitute his chief "store news."

The readers of this paper accept his advertisement as the record of his store week by week—not only of the things he is doing, but of the things he is preparing to do.

In this important regard the merchant has an advantage, in the publication of his newspaper, over the publisher of the paper which carries his news for him. For the publisher may print the news that has happened—no more—while the merchant CREATES and prepares the happenings which his newspaper advertising describes.

He may make these store-happenings a series of routine sales-events, or he may make them a series of surprises.

His advertising may be thus made merely serviceable to the readers of this newspaper, or it may be made deeply interesting, and a continued story of enterprise, of active, alert and responsible public service.

A good store is one of the most interesting of human institutions: and the advertising of a good store should be made to rank with the most interesting of reading matter.

And while the "happenings" in a good store are all ordained, so far as they relate to sales and special promotion of particular kinds of goods, there are other store-events which rather force themselves upon the merchant.

The unexpected may happen as to sales in some special line of seasonable goods—the merchant may be left with a larger surplus of stock than he can carry. Then he is forced to make "something happen." He arranges a special sale, makes unusual price concessions, and the event is NEWS to every patron or prospective patron of his store.

The alive merchant realizes that he must see to it that his store is a store of events, where things happen—and to make the profitable advertising of such a store a reality is an easy task.

The people of the extensive district in which this paper circulates cannot be as effectively or as economically reached by any other medium or method for advertising as by the columns of this paper.

## Irma Times

### "A LITTLE CHILD SHALL LEAD THEM"

(From The Viking News)

The finding of the body of the little Lindbergh baby only five miles from the Lindbergh estate in New Jersey, last week, brought to an end a world-wide search for it since being kidnapped on March 1st. Sane, law-abiding citizens cannot imagine such fiendish cruelty as was perpetrated in the wanton murder of the smiling innocent baby, with as bright a future as any baby ever born. The sympathy of an anxious world has been with the Lindberghs ever since the baby was stolen from his crib. After Lindbergh flew the Atlantic alone he became a world character, and his every move has been heralded to all corners of the earth by an ever alert public press. His marriage to Miss Anne Morrow, daughter of the late Dwight P. Morrow, ambassador to Mexico, did not diminish the public interest. Naturally the sorrow and grief that has come to this unassuming couple has and is shared by people in all walks of life.

What of the kidnappers? Will they be caught and punished? The president of the United States has ordered an unrelenting search until they are found and brought to justice. If the death of the Lindbergh baby can arouse American public opinion to such a pitch as to institute a nation-wide purging of the cancer that is eating the heart out of the republic, gangsters, kidnappers, bootleggers, blackmailers, grafters, and dishonest public officials will be placed in the category that they belong—murderers—and exterminated like the vermin they are.

If, we say, the death of the Lindbergh baby will start a national clean-up in the republic, his death will not have been in vain.

### NATURE'S OWN HUMIDIFIER

A live tree is about one-half water by weight. An acre of maple trees evaporates about 2700 gallons of water a day. Pine and spruces evaporate about a tenth as much. Such a constant discharge of water influences rainfall over the forest and areas adjacent thereto. The soil beneath a forest lets loose its moisture only a third as fast as soil in the open country. Thus it comes that deforested land is a bad feeder of streams, giving off its water content rapidly and dangerously, whereas the streams fed by adjacent forests maintain a high level and purity the whole summer through.

### NO RAINBOW FOR YOUTH

What are the new crop of student graduates from high schools and universities going to do? Where is there a job for them to do, a niche in which they might fit?

These boys and girls have been extensively trained—costly to the taxpayers in general and to their parents in particular—and now they are ready to set out in life. And there is no place for them to go!

It is tragically enough to see an adult without work. But the adult has seen the colors fade from his youthful rainbow. But here are young boys and girls starting out under a bow of crepe. Not for them the keen sweet joy of bright, adventurous hope! They are launched into a world suffering under the worst depression history has recorded. They see gloom and suffering, hardship, unemployment and privation on every side.

The youth of today are unfortunate. They are deserving of sympathy as any group of young people ever were.

—Hanna Herald.

## IRMA TIMES

H. W. LOVE, Prop.  
A Good Advertising Medium and a Reliable Newspaper on Oil Activities

Advertising posters for the Calgary Stampede, July 11th to 16th are already out. The Stampede association at least know how to advertise and get it out early.

The last big construction drive Churchill port will see, is under way now, according to reports from Manitoba's seaport. Final touches are being put on the northern terminal of the 500 mile Hudson Bay Railway, and forces of the railway and the department of railways and canals are combining to prepare this port for wheat shipments out of and imports into Canada this season. Late this month a new phase in the development of the port will be reached, when employees of the Manitoba government arrive to prepare the townsite for the official opening this summer.

The recent assassination of the premier of France and the premier of Japan, suicides and other disturbances and riots shows the great unrest and dissatisfaction with conditions that exist throughout the world. To kill and maim people will not solve the problems, but rather aggravate the situation. Every nation, every class, every individual is affected, and it is up to everyone to grapple with their own problems and not blame the other fellow for what the world at large is suffering.

The Edmonton Grads ladies basketball team have again shown their ability to turn back the best team that the United States can bring up. On Saturday evening and Monday evening they defeated the Chicago Red Devils in a two game series for the International Trophy by the total score of 93 to 59. The Grads are attending the Olympic games at Los Angeles in July and no doubt they will again be crowned world champions—which they have proven themselves to be in every way.

### RUSSIA BUYING

**CANADIAN WHEAT**  
The International wheat trade was rather surprised at the action of Soviet Russia in coming into the market for the purchase of several million bushels of wheat for shipment to the Far East. Most of the wheat purchased so far is Alberta wheat from the area of Vancouver. The rumor is that this wheat is needed for food for Russian armies concentrated in the area contiguous to Manchuria. It is generally accepted that Russia is in rather a serious plight so far as wheat supplies are concerned in certain areas where there were crop failures last year. Wheat shipments from Russia's Black Sea ports have virtually ceased for many weeks.

### THE OLD DAIRY COW

The farmer's best friend is the old dairy cow;  
If she owes a debt, she will pay it somehow;  
She grazes the roadside to eke out her life  
And works without wages the same as his wife.  
Thouza Jersey or Holstein or Short-horn her breed,  
Hard work is her habit and thrift is her creed,  
And if, when she comes home at night to the barn,  
You praise her, or blame her, she won't give a darn.  
She always has something to add to your pelf,  
She brings in the coupons, just clip them yourself  
Get out the old milkstool, sit down with a bump,  
Grab hold of her handles and untie your pump.  
And if, in her efforts to brush off a fly  
She happens to switch her tail spang in your eye;  
She murmurs "Beg pardon" politely  
And goes on with her chewing—and does it again.  
She helps with the living and keeps us all fat,  
The hired man, the baby, the pig and the cat;  
Then takes the surplus to town, and by heck,  
The creamery gives him a wonderful check.  
And when she is ready to die of old age  
The butcher write "finis" at the end of her page;  
Then back to our table she comes, I'll be bound,  
In prime ribs and steaks that cost thirty a pound.  
All hail to the heifer, the steer and the calf,  
The curly-faced bull, with his bangs full of chaff,  
But when at our evening devotion you bow,  
Give thanks for that treasure—the old dairy cow.

—Milk Producers' Review.

## Mail Box.

The following letter has been received by a resident of the Irma district from her sister in Russia, these people are Germans but are not allowed to leave that country. The letter, translated, reads as follows:

Dear Sister and Brother-in-law:  
How are you? We have not heard from you since a year. If you are well, give God thanks for your health. We have nothing to eat here. If God will take our three children all in one night we will give thanks. We have to die all from hunger. It was a bad crop. Rain all the time. Three times we planted potatoes and all spoiled. If we could keep our little bit we could get something to eat, but we have to give it away. I can't write you all like it is here. . . . Many people die from hunger. We had a few bushels of rye for flour and my husband had to go away for one month for Bolshevik training and they steal all our flour. We had this winter no bread, just eat potatoes one time a day. Everything is dear and we have no money. Forty pounds of potatoes cost \$6. Forty pounds of rye flour \$35.00 and forty rounds of wheat flour \$50. Everything so dear you can hardly believe it. I cry every day instead of eating.

I worry all the time for my children—how I can get them bread. I do not want to see them die. I don't care if my husband or I die, if God so wants, but my poor children cry all the time—"Papa, Mamma, give me bread" and we have not got it. My heart breaks when I think of my poor children to have to die from hunger. We have just a few poor potatoes left then we have nothing, nothing, nothing—no pig, no chickens. We have no feed for them. We would give thanks if we could eat now the feed we give here our pigs. We would like to sell our clothes but no one has money to buy. I cannot write any more now.

### SWEET CLOVER FOR SEED

Perhaps the greatest loss the grower of sweet clover seed sustains is from the use of seed, and the production of dirty seed. A crop containing few weed seeds when threshed can readily be cleaned. On the other hand, it is impossible to clean up seed foul with weeds by use of the average farm cleaning equipment and expensiveness to make money by the sale of seed or to have a No. 1 sample for home use.

This crop may either be seeded broadcast or in rows. On all Dominion Illustration Stations in Manitoba it is broadcast since this is the most practical method. Best results are being obtained by operators who seed with wheat on clean summer-fallow. On one Station clean crops have been grown when the seed is put in with oats on stubble ploughed land. The oats are cut in July for greenfeed and when some many weeds are removed. This practice also gives the clover a better chance to become firmly established. When sowing the rows must be three feet apart the grower must be prepared to do considerable hand hoeing and cultivating to ensure a clean crop. When using this method, stubble land can be utilized. It can be fallowed until July at which time the seed is sown. Subsequent harrowing, cultivating and weeding will be necessary to keep the crop clean. If this is well done a clean crop the next year is practically assured. The disadvantage to a crop in rows is that it usually grows tall and strong and presents difficulty when harvesting and threshing.

If the crop is firmly established, it is ten inches high. This not only moves weeds but induces the clover plants to branch more with the result that the crop will be shorter and finer, making it easier to cut and thresh. On many farms hay is taken in July and the second crop left for seed. This is not a wise practice however, unless the season is early and the hay can be removed at least in July. On several Illustration Station farms clean crops of seed have been produced after pasturing the field during the spring and early summer.

It is not always an easy matter to decide which is the most advantageous time to cut a seed crop of clover. The natural desire of the grower is to harvest when most of the seed can be secured in a well ripened state. Even at this stage some seed will have fallen, some will still be green while there may be flowers on the apex of the stem. A fairly safe guide, however, is to cut a raceme or seed stalk through the hand firmly, and if most of the seed detaches readily the crop should be cut.

After the seed is threshed, it should be fanned to remove all trash, and to separate hulls from unhulled seed. Following this, the unhulled seed can be ground through a plate grinder to remove hulls. If the plates are sharp and are set close enough to crack a small

## RESTFUL SLEEP for FRETFUL, FEVERISH CHILD

—With Castoria's regulation

When your child tosses and cries out in his sleep, it means he is not comfortable. Very often the trouble is that his bowels are not moving. It is not being carried off as it should be. Bowels need help—mild, gentle help—but effective. Just the kind Castoria gives. Castoria is a pure vegetable preparation made especially for children's ailments. It contains no harsh, harmful drugs, no narcotics. Don't let your child's rest—and your own—be interrupted. A prompt dose of Castoria will urge stubborn little bowels to act. Then relaxed comfort and restful sleep! Genuine Castoria always has the name:

*Dr. J. C. Hamilton*  
**CASTORIA**  
CHILDREN CRY FOR IT

## WORLD HAPPENINGS BRIEFLY TOLD

Lord Irwin, former viceroy of India, said he was encouraged by the spirit of optimism in western Canada.

Prince Peter of Montenegro, brother of Queen Elena of Italy, died recently at Bolzano, Italy.

Green peas, the seed of which are said to have come from King Tutankhamen's tomb, are being grown by M. Pejstrup at Pass Lake, Ontario.

The United States senate rejected a proposal for a year's suspension of military and naval armament construction.

There has been an increase of 580 head of cattle shipped to Great Britain through Montreal port over the same period last year.

Manitoba, Saskatchewan, and Alberta government representatives will meet early in June to prepare statements for the forthcoming Imperial Economic Conference.

Captain Hilton H. Bailey, who with Simon Lake, the inventor of the submarine, hopes to raise the "Lustania," states actual work on the project will begin early this fall.

Commander F. W. Nelles has been appointed commander in charge of Halifax naval port. Commander V. C. Brodeur at Halifax now will go to Esquimaut.

It is proposed to form a pool for carrying on export business from Canada to Latin America, to prevent Canadian goods losing their identity on passing through United States hands.

Winston Churchill, former Chancellor of the Exchequer, in an address recently, asked the United States and Great Britain to join forces in leading the world "out of these gloomy caverns into the broad sunlight of activity and progress."

If the Dominion Government assumes 75 per cent. of old age pension costs, the City of Calgary will ask the Alberta Government to assume the 10 per cent. of the cost now borne by this city, according to a statement by Mayor Andy Davison.

## Claims Founding Of Club

Although the city of Hamilton is reported to be planning to celebrate this year the 40th anniversary of the origin of the Canadian Club, it is claimed Guelph was the city where the club had its birth. It is contended Malcolm MacCormack, farmer school principal here, founded the club in 1888 along with a group of prominent Guelph men.

Light from a cloudy sky is equal to a brightness of 225 candlepower square foot.

## Acidity Overcome

Wonderful Results From  
Famous Vegetable Pills

Instead of having an acid stomach and being constipated, Mr. Frank C. is well. "I can eat anything since trying Carter's Little Liver Pills," he says. Because they are PURELY VEGETABLE, a gentle, effective tonic to both liver and bowels, Mr. Carter's Little Liver Pills are without equal for correcting Constipation, Biliousness, Headaches, Poor Complexion and Indigestion. 25c. & 75c. red pigs, everywhere. Ask for Carter's by NAME.

## Paradise For Fishermen

Once Baren Lakes In North Now Teeming With Trout

Trout fry placed in the heretofore barren waters of the Medicine-Maligne Lake system in Jasper Park by the fish culture branch of the Department of Fisheries, grew and multiplied so quickly that during the past summer fish as heavy as six pounds were taken by anglers and there seemed to be a limitless supply.

Using rod and line for test fishing in Maligne, Dr. Bajkow and Dr. Neave found sport "so good that three or four hours with one rod produced over 100 pounds of fish." In Beaver Lake which lies about a mile from the southern portion of Medicine Lake, "as soon as the spoon struck the water the trout rushed from all directions." In order to get some further idea as to the abundance of the fish the investigators set a 30-foot gill net in Beaver Lake. "Over 400 fish were caught in about two hours, so that most of the next two hours had to be spent in cutting the meshes of the net and releasing the fish into the lake again."

The trout are growing to be big fellows, too. The first fry put into the Medicine-Maligne system by the fish culture people were distributed in 1928. That's only three years ago, but a trout taken in Maligne Lake a few weeks ago tipped the scale at six pounds, an exceptional weight for a 3-year-old speckled trout.

IT CATER'S FOR A SCARF EFFECT THAT WILL "STAY PUT"

Delightfully young and smart is this new slim-line model. Since crepe silk both plain and print is so charming, it was chosen for this fascinating model.

It is light navy blue spotted in red. The soft crushed scarf collar gives it such distinction in plain white crepe.

Another ideal suggestion is plain crepe in soft beige shade self-trimmed.

For summer wear, handkerchief linen prints, batiste prints and tub silks are nice mediums.

You'll find it very simple to fashion, and the cost unbelievably small. Style No. 899 is designed for sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Size 16 requires 3 1/2 yards of 39-inch material with 1/2 yard of 39-inch contrasting.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## Is Still a Mystery

No Trace Of Winnipeg Child Who Disappeared Four Years Ago

Torn and yellowed with time, a circular hangs on the bulletin board of Winnipeg's central police station offering a reward for information leading to the discovery of Julia Johnson, a mute reminder of Winnipeg's parallel to the recent kidnapping of Augustus Lindbergh, Jr.

Four years ago Julia, a laughing-eyed Polish girl, vanished from in front of her home as mysteriously as the little son of the flying colonel. Efforts of the police of an entire continent were immediately enlisted in an effort to trace the tot, but without success.

No demands for ransom were received following Julia's disappearance. She was reported to having been seen in various sections of the city in the company of an old man. Police dogs were put on her trail and hundreds of citizens organized search parties which led into remote corners of Manitoba in a fruitless attempt to find a solution of her disappearance. Julia would now be nine years old. Her parents still believe she will be found some day. Each year a candle is added in her home and the sympathy of at least one Winnipeg mother goes out to Mrs. Anne Morrow Lindbergh in the loss of her baby in a way that only a fellow sufferer can understand.

## Collected Queer Articles

So-Called Pauper With Fortune In Bank Had Odd Hobby

Investigators in Hamilton, Ontario, probing the strange case of Abadiash Markle, the so-called pauper who died leaving a bank account of \$14,000 found themselves faced with the most baffling collection of articles ever seen outside a museum today.

Markle died over a month ago, apparently in penury, and was buried at the city's expense. Later it was discovered he had \$14,000 in the bank. Large packing cases were located in a storage warehouse, in Markle's name, and were opened in the presence of witnesses.

Among the things found were these: Newspaper of the Royal Hotel, many years defunct; 200 rubber heels, old-fashioned bartenders' rubber shirt fronts, a collection of 300 hats, coachmen's hats, plaid caps, derbies which revealed every fashion from the 80's onward; a large assortment of keys for opening sardine cans, huge stocks of bedding, coat buttons, hairpins, powder puffs of yesteryear, soup spoons, patent eye testers, sample books of greeting cards, paper ice cream spoons and many other peculiar articles.

## Largest Welded Bridge

What is considered the largest welded bridge in the world has just been completed in Pilsen, Czechoslovakia. It crosses two railroad tracks, has a span of 101 1/2 feet, and a width of 27 1/2 feet. The total weight is 145 metric tons, which is said to be 21 per cent. less than that of a riveted structure designed for the same purpose. Another unusual feature is the spiral ramp at one end, necessitated by limited space.

My dear friend—let bygones be bygones—now we do a little business together—no?—Daily Herald, London, England.

## Great Canadian Hero

Colonel Mulloy Set High Example For Loyalty To The Empire

Colonel Lorne Winfield Mulloy, D.C.M., B.A., died unexpectedly at his home on the St. Lawrence River, Iroquois, Ontario, at 11 p.m. Sunday, February 21st, 1932, from heart attack, aged 53 years. Thus, with dramatic suddenness, there was removed from Canadian public life, one of its most brilliant intellects and inspiring figures.

Blinded in the South African War, Colonel Mulloy mastered every obstacle imposed by his wounds, cheerfully created fresh obstacles to surmount, scorned the paths of least resistance, was supremely successful in all tasks he undertook, and his death came at a time when his powers of intellect and his great executive abilities appeared destined to still further achievements.

Born on a Canadian farm, blinded in his early twenties, he continued his education with the aid of a secretary, graduated with honors from two famous universities, became one of the most outstanding speakers of our day on subjects of political economy, was named more than once a member of the British House of Commons, was on the staff of the Royal Military College, became a successful practising lawyer, and his services to Canada during, and immediately after the war, were sufficiently conspicuous to deserve amplification.

He has been referred to as the father of Union Government in Canada. His fight and arguments for compulsory military service are believed to have been the deciding factor in causing the United States to declare against the inefficiency of voluntary enlistment.

As early as 1910 he was one of the leaders in Great Britain in the fight for tariff reform and Empire preferences, such as are now being negotiated by the several governments affected.

Mulloy's physical handicap was not perceptible to his friends, and he refused to recognize his lack of sight as either a misfortune or a handicap. His physical assurance was magnified. He could swim, ride, row, fish, or drive a golf ball with any man. Alone he has piloted a row boat across the St. Lawrence River in a gale. He could untangle a fishing line more quickly than any companion. He never walked except at a trot. He has never been an incontinent traveller, and he never had an accident.

His humour was scintillating, clear and infectious; invariably he looked through and beyond the dark side of life. He was the soul of sincerity, generosity and integrity.

Mulloy's life should be printed in every school book, told from every pulpit and repeated at every Canadian freemason. As a practical and thrilling inspiration to the boys and girls of this country, this epic of courage and triumph and high ideals will perhaps never be exceeded.

## Some Amazing Facts

Many Objects Which Seem Small Are Very Wonderful

A drop of blood contains three million red globules, and there are more germs in the milt of a single codfish than men in the world. So small is this germ that one grain of sand is four million times larger than it. A hundred threads of the silkworm are just one-twenty-fifth of an inch thick when placed side by side, but there are some metals that can be drawn out to such a fineness that twelve hundred wires are only as thick as a hundred silkworm threads.

Old Faithful geyser in Yellowstone national park shoots to a height of from 85 to 130 feet.

## The Pressure Of Necessity

Teaches People They Can Do What They Thought Impossible

A great many people now know the mind of the frog that Charles F. Kettering, chief research engineer of General Motors told about.

A deacon was on his way to church one Sunday morning, dressed in his best with his shoes nicely polished, when he heard his name called from a mudhole near the roadside. Down in the hole was a big bullfrog.

"I have been here three days," said the frog, "without anything to eat, and I wish you would help me out." The deacon looked at mud and looked at his shiny shoes and remembered that he had to pass the collection plate in church, so he replied: "I'm sorry, old man, I can't help you now, but on my way back from church I'll give you a lift out of the hole."

As he came back from church, the deacon was surprised to find the frog sitting in the middle of the road, contentedly snapping at flies.

"I thought you said you couldn't get out of that hole," said the deacon. "I thought I couldn't either until a snake came along and I just had to get out," replied the frog.

Lots of people are discovering these days that they can do things they didn't think they could do. Under the pressure of necessity every one of us can accomplish the impossible. In good times nobody uses more than a fraction of his ability and resourcefulness. But when the snake of hard times comes along, we just have to get out of the hole, and like the frog in Mr. Kettering's story, we find some way to do what we didn't believe we could do.

It is a good thing for humanity that life is not always pleasant and easy. Intelligence, ability and character are only developed to their best in the face of adversity. And the harder the struggle, the more fun there is in looking back on it after the peak has been passed.

## Recipes For This Week

(By Betty Barclay)

### LEMON SPONGE PIE

(Makes 1 pie)

- 3 egg yolks, beaten thick.
- 5 tablespoons lemon juice.
- 1 teaspoon grated lemon rind.
- 1 cup sugar.
- 3 tablespoons flour.
- 1/2 teaspoon salt.
- 1 tablespoon melted butter.
- 1 1/4 cups milk.
- 3 cups cream.

Combine all ingredients, folding in last stiffly beaten egg whites. Turn into pie tin lined with uncooked pastry and put into hot oven (450 degrees Fahrenheit). After 10 minutes reduce heat to moderate (350 degrees Fahrenheit) and bake 20 minutes longer, or until filling is firm.

### ALL-BRAN QUICK BREAD

- 3 cups flour.
- 2 cups all-bran.
- 1/2 teaspoon salt.
- 1/2 teaspoon soda.
- 2 teaspoons baking powder.
- 1 tablespoon sugar.
- 1/2 cup molasses.
- 2 cups milk.
- 2 eggs.
- 1 cup chopped nuts.

Sift dry ingredients. Add bran. Then add molasses, egg slightly beaten to milk. Stir into dry ingredients, mixing well. Add nuts and melted shortening. Pour into a well greased loaf pan. Let stand 15 minutes. Bake in a moderate oven, (325 degrees Fahrenheit) from one to one-and-a-half hours.

## Story Of Near Disaster

Crew Of Small Motor Tanker Fight Blazing Fire While Crossing Atlantic

Trapped by a blazing fire while crossing the Atlantic the crew of the little motor tanker "John George," fought for hours to subdue a blaze that threatened destruction of the 79-ton vessel. For 26 days after the blaze had been extinguished the 130-foot ship was steered by hand all the way across the ocean and brought into Montreal.

The story of near disaster to the "John George" was related in a casual way by her captain, Arthur Storey. The "John George," en route to the Imperial Oil Works at Toronto, left Greenwich April 7.

May X-Ray Insulin  
The University of Illinois announced successful completion of the first step of a series of experiments which will enable scientists to use the x-ray in studying insulin, the rare and expensive solid used in treatment of diabetic patients.

## "LOCK YOUR DOOR ON BIRTHDAYS!"

SAYS  
HUGH TREVOR

Famous Screen Star

"The woman who wants to win and hold adoration should keep youth," Hugh Trevor says.

"Sing and screen stars hold the admiration they have won year after year. Birthdays don't matter at all. And nowadays other women are learning their complexion secret."

"Every woman should learn the complexion secret these screen stars know!"

The stars do know the secret of growing lovelier each year! "Regular care with fragrant Lux Toilet Soap is the secret," the famous actresses will tell you. "This lovely white soap keeps skin youthfully glow."

That is why Lux Toilet Soap is the official soap in the dressing rooms of all the great film studios! Your skin will respond to it. The cream of dollar-a-cake French soap for just 10c. a cake!

## Makes Hazardous Trip

Eskimo Brings Sick Wife To Church—In Small Boat

The dangers of two-hundred mile trip in an open boat, little better than a canoe, through the ice-filled waters of Hudson Bay were faced by Ekolo Enuk, young Eskimo hunter, in bringing his wife to Churchill to receive "white man's medicine."

His wife took sick and as she sank lower Ekolo determined to risk all in the hope the hospital at Churchill would save her life. Unable to travel by dog team, he took out his seal-covered boat and set out on the long trip. He hugged the rugged coast line of the bay, avoiding the ice that swept round him and threatened to swamp his canoe with the precious burden.

For nearly two weeks he travelled. His store of food was nearly exhausted, and he was visibly worn, with the hardship of the long paddle, when he crawled over the ice surrounding the port bringing in his wife.

Medical men at Churchill say that his wife has a minor stomach trouble that will be easily cured under proper care but would have likely cost her life if she had not been rushed down to receive medical attention. Ekolo brought a big collection of furs to pay for the white man's magic, but workmen here have taken up a collection to pay his expenses.

## Russia Arranges Credit With Turkey

Based On Goods Exchange Without Actual Money Payments

A new economic alliance between Soviet Russia and Turkey, under which this country is extending an \$8,000,000 long term credit to its Islamic neighbor, has been announced by Foreign Minister Tewfik Roshdi Bey of Turkey.

The credit is the first ever granted by the Soviet Government, which until now has been a seeker instead of a giver of credit in the world market. It is based on an exchange of goods in kind under actual monetary payments.

Under the agreement Soviet Russia will sell industrial tools, agricultural machines and fertilizers to Turkey, receiving as payments its choice of Turkey's natural resources, such as tobacco, wool, fruits and minerals.

Czechoslovakia may increase its sales tax by 25 per cent.

## THE HOUSE OF DREAMS-COME-TRUE

— BY —  
MARGARET FIEDLER  
Author of  
"The Splendid Folly," "The Hermit  
Of Far West,"  
Hodder & Stoughton, Ltd., London.

CHAPTER XXI.—Continued.

"Beg pardon, my lady," he said, touching his hat, "Sir Adrian sent me to say that he's waiting for you in the car just along the road there." He pointed to where, on the white ribbon of road which crossed the Moor not far from the base of the tower, a stationary car was visible.

Claire, her face ashen, turned to Nick in mute appeal.

"Sir Adrian? I thought he left for London this morning?"

Nick shot the question fiercely at the chauffeur, but the man's face remained respectfully blank.

"No, sir, Sir Adrian drove as far as Egerton and then returned.—Afterwards we drove on here, sir, and they told us in the village we should find you at Shelston Tors."

Meanwhile the other members of the party were becoming aware that some contretemps had occurred. Claire's white, stricken face was evidence enough that something was amiss, and simultaneously Lady Anne and Jean hurried forward, filled with apprehension.

"What is it, Claire?" asked Lady Anne, suspecting bad news of some kind. "What has happened?"

Recognising the chauffeur and continued quickly: "Has Sir Adrian met with an accident?" She could conceive of no other cause for the man's unexpected appearance.

"No, my lady, Sir Adrian is waiting in the car for her ladyship."

"Waiting in the car?" repeated Jean and Lady Anne in chorus.

The little group of friends drew closer together.

"Don't you see what it means?" broke out Claire in a low voice of intense anger. "It's been all a trick—a trick! He never meant to go to London at all. He only pretended to me that he was going, so that I should think that I was free and he could trap me." She looked at Nick and Jean significantly. "He must have

## Too Much ACID

MANY people, two hours after eating, suffer indigestion—as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from acidity when you prove out this easy relief.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. 50c a bottle—any drug store.

The ideal dieting food for clean teeth and healthy gums is Phillips' Dental Magnesia tooth-paste.

W. N. U. 1942

overheard us—that day in the shrubbery at Charnwood—you remember?" They both nodded. "And then planned to humiliate me in front of the whole party."

"But you won't go back with him?"

exclaimed Nick, hotly. He swung round and addressed the chauffeur stormily. "You can damn well tell your master that her ladyship will return this evening with the rest of the party."

The man's face twitched. As far as it is possible for a well-trained servant's face to express the human emotion of compassion, his did so.

"It would be no good, sir," he said in a low voice. "He means her ladyship to come. 'Go and fetch her away, Langton,' was his actual words to me. I didn't want the job, sir, as you may guess."

"Well, she's not coming, that's all," declared Nick determinedly.

"Oh, I must, Nick—I must go," cried Claire in distress. "I—I don't stay."

Lady Anne nodded.

"Yes, I think she must go, Nick dear," she said persuasively. "It would be wiser."

"But it's damnable!" ejaculated Nick furiously. "It's only done to insult her—to humiliate her!"

Claire smiled a little wistfully.

"I ought to be used to that by now," she said a trifle shakily. "But Lady Anne is right—I must go."

She turned to the chauffeur, dismissing him with a little air of dignity that, in the circumstances, was not without its flavor of heroism. "You can go on ahead, Langton, and tell Sir Adrian that I am coming."

The man touched his hat and moved off obediently.

"Nick and I will walk down to the car with you," said Lady Anne. She was fully alive to the fact that her escort might contribute towards ameliorating the kind of reception Claire would obtain from her husband. "Jean dear, look after everybody for me for a few minutes, will you? And, raising her voice a little, "explain that Claire has been called home suddenly, as Sir Adrian was not well enough to make the journey to town after all."

But Lady Anne's well-meant endeavor to throw dust in the eyes of the rest of the party was of comparatively little use. Although to many of them Claire was personally an entire stranger—since Sir Adrian intervened whenever possible to prevent her from forming new friendships—the story of her unhappy married life was practically public property in the neighborhood, and it was quite evident that to all intents and purposes the detestable husband had actually insisted on her returning with him, exactly as a naughty child might be swept off home by an irate parent in the middle of a jolly party.

It was impossible to stem the flood of gossip, and though most of it was kindly enough, and wholeheartedly sympathetic to Lady Latimer, Jean's cheeks burned with indignation that Claire's dignity should be thus out-

rage. The remainder of the afternoon was spent for her, and Nick's stormy face when he, together with Lady Anne, rejoined the rest of the party did not help to lighten her heart.

"I'm so sorry, Nick," she whispered compassionately, when presently the opportunity of a few words alone with him occurred.

He glared at her.

"Are you?" he said shortly. "I'm not. I think I'm glad. This ends it. No woman can be expected to put up with public humiliation of that sort."

"Nick?" There was a sharp note of fear in Jean's voice. "Nick, what do you mean? What are you going to do?"

There was an ugly expression on the handsome boyish-looking face.

"You'll know soon enough," was all he vouchsafed. And swung away from her.

Jean felt troubled. She had never seen Nick before with that set, still look on his face—a kind of bitter

concentration which reminded her forcibly of his brother's, and she rather dreaded what it might portend. Her thoughts were still occupied with the afternoon's unpleasant episode, and with the possible consequences which might accrue, as she climbed into Burke's high dog-cart. She had had a fleeting notion of claiming Claire's vacant seat for the homeward run, but had dismissed it since actually Claire's absence merely served to provide comfortable room for Blaise in the Willow Ferry car, which had held its full complement of passengers on the outward journey. Moreover, she reflected that any change of plan, and with it the agreed to drive back with Burke, might only lead to trouble. He was not in a mood to brook being thwarted.

A big, raking chestnut, on wires to be off, danced between the shafts of the dog-cart, irritably pawing the ground and jerking her headscarf, sat in the dog-cart, and down with a restless jingle of bit and curb-chain. She showed considerably more of the white of a wicked-looking eye than was altogether reassuring as she fought impatiently against the compulsion of the steady hand which gripped the reins and kept her, against her will, at a standstill. The instant she felt Jean's light foot on the step her excitement rose to fever heat. Surely this must mean that at last a start was imminent and that that firm, masterful pressure on the bit would be released!

But Burke had leaned forward to touch the light dust-rug round Jean's knees, and regarding this further delay as beyond bearing the chestnut created a diversion by going straight up in the air and prouetting gaily on her hind legs.

"Steady now!"

Burke's calm tones fell rebukingly on the quivering, sensitive ears, and down came two shining hoofs in response, as the mare consented to resume a more normal pose. The next moment she was off at a swinging trot, basking every now and again, out of pure exuberance of spirits, into a canter, sternly repressed by those dominating hands whose quiet mastery seemed conveyed along the reins as an electric current is carried by a wire.

"You needn't be afraid," remarked Burke. "She'll settle down in a few minutes. It's only a 'stable ahead' feeling she's suffering from. There's not an ounce of vice in her composition."

"I'm not afraid," replied Jean composedly.

(To Be Continued.)

## Arguments Against Bay Route

Montreal Man Has Faith In Northern Seaway As Potential Grain Outlet

"Most of us older men remember the struggle for recognition of the St. Lawrence route when all the present arguments against the Hudson Bay route were put forward against the St. Lawrence," declared Thomas Harling, veteran Montreal ship agent, in defending the Hudson Bay route as a potential grain carrier.

"All these objections were overcome in time, and the St. Lawrence is now an accepted fact. Furthermore, it is not many years ago that Vancouver was thought an impossible outlet for Canadian grain. It was said that it could not be carried through the tropics via the Panama Canal. This route is now established and is unquestionably of the greatest advantage to the Alberta farmers," Mr. Harling continued.

"Would it not be better for all those interested in the grain trade of Canada to try and help, rather than to hinder, this new route, which, when it becomes established, as in time I firmly believe it will, can be of very great benefit to all grain growers in the northern sections of the prairie provinces? It is, in my opinion, despite its comparatively short distance of navigation, that the Hudson Bay route will carry a very considerable trade both eastbound and westbound, and will result in a great saving in transportation costs to the large area of country directly tributary to it," he said.

Mr. Harling added the owners of the Farinow and "Warkworth," which opened the route as grain carriers last year, were entirely satisfied with their experiences and were ready to send these steamers again or other tonnage required during the coming season. They were willing to accept rates not exceeding those paid last season, he said.

Hubby—"You never have any affection for me; you'd never think of calling me 'dear' as other men's wives do."

Wife—"Do other men's wives call you dear?"

Mexico's only surplus crop carried over into 1932 was sugar.

## Best oil, cheapest in home, says factory sup't.

"The last thing we'd try to economize on," says the superintendent of a large eastern factory, "is lubricating oil. By using cheap oil we could 'save' hundreds of dollars each year—but it would cost us thousands of dollars for repairs, replacements and lessened efficiency of equipment."

The same is true in the home. If all housewives knew what factory men know about lubrication, few of them would use anything but 3-In-One Oil for their expensive sewing machines, vacuum cleaners, electric fans, lawn mowers, washers, and other household devices. 3-In-One, a blend of mineral, vegetable and animal oils, is the best oil for household use, for it cleans and protects as well as lubricates.

Cook—the old reliable 3-In-One Oil at good grocery, hardware, department and general stores. For your protection, look for the trade mark "3-In-One" printed in red on every package.

## No Combatant Ships Cruising On Atlantic

Something That Was Never Known Before World War

No combatant ships of the United States navy remain on the Atlantic Coast—something never known before the World War. The theory that the United States must adhere to the policy of distributing units of the fleet to protect industrial Eastern States is still recognized in navy plans, but except Great Britain there is now not sea power on the other side of the Atlantic that could afford to challenge our naval strength.

Great Britain is so sure of the good-will of this country that her warships on duty in the West Indies and at Halifax are mere patrol boats. One of them was ordered to St. John's, Nfld., the other day when street rioting threatened.

At the present time the United States fleet is in the Pacific, the battleships, and their auxiliaries in home waters, and a squadron in the Far East. There they are likely to pass the summer. Not a single combatant ship flies her flag in the Atlantic, although the principal yards and bases are on this coast, and strategic Guantanamo, with Culebra, Port of Rico, may be said to have only caretakers.—New York Times.

## Clings To Old Customs

Purple In Siam Keep Up Habits Of Ancestors

Shaving the heads of men and boys in Siam, is a religious rite, and is performed in the temple by priests. Although the Siamese have taken up the modern ways of the West, the old customs are being introduced into their governmental life, they remain at heart typically oriental and cling to the ancient customs of their ancestors. White elephants march in their sacred processions, maidens dance in the temples as they have done for centuries, the king is carried in a palanquin, and, save for the occasional buzzing of an airplane, the visitor to Siam could easily forget that he is living in the 20th century.

## Made An Impression

Kind Act Earned Certain Amount Of Notoriety For Traveller

The traveller, arriving late at his destination, had to be content with cold chicken for his evening meal. When he had finished he noticed a tramp outside the window, eyeing the remainder of the chicken hungrily, so he passed it through to him. A year later the traveller called at the same hotel for another meal, and was out the manager, and pointing to the visitor, said excitedly: "There he is, sir; That's the man who ate the chicken—bones and all!"

## Larger Greenhouse Area

Glass used in the greenhouses and hotbeds on Vancouver Island and the Lower Mainland, British Columbia, covers an area of approximately four million square feet, an increase of over 200 per cent. in the past eight years.

A compact device for humidifying homes and apartments in winter has been produced.

## for SCIATICA

Wash the painful part well with warm water; then rub in plenty of Minard's and you'll feel better!

**MINARD'S**  
"KING OF PAIN"  
LINIMENT

## How Air Films Are Made

Handicaps Have Been Overcome By Use Of Motor Driven Cameras

Film stories of aviation present more handicaps during production than almost any other type of screen fare, according to Stephen Roberts, Mr. Roberts is the wartime aviator and former stunt driver who went to Hollywood to direct "Sky Bride."

"The one reason airplane movement falls to furnish thrills and interest is because of the 'plane's lack of background," he said on his return. "In playing action against a blank, even a clouded sky, it is difficult to convey a sense of speed."

"With the cameras on the ground, the airplanes usually are so distant that the speed is lost on the screen. With the cameras in a balloon or on a high tower, the range of their activity is limited. With the cameras in another 'plane, both camera-ship and the 'plane being photographed must travel at relatively the same speed to allow filming of close shots, and once more all sense of speed is lost."

"Electrically controlled cameras are the way we succeed in capturing effective scenes in the air. We attach these motor-driven cameras to the rim of the cockpit, pointing backward, right into the flier's face."

"We rehearse the scenes on the ground, then send the boys up alone. When the right altitude is reached, the actors press a switch and the camera starts grinding while the actor plays the scene himself, without direction."

## Little Helps For This Week

"Bear ye one another's burdens, and so fulfil the law of Christ."—Galatians vi.2.

What is the real good? I asked in misty mood. Order, said the law-court; Knowledge, said the school; Truth, said the wise man; Pleasure, said the fool; Love, said the maiden; Beauty, said the dreamer; Home, said the sage; Fame, said the soldier; Equity, the seer—Spoke my mind sadly. The answer is not here. Then within my bosom, Softly this I heard, "Each heart holds the secret, Kindness is the word!"

John Boyle O'Reilly.

But now God has so ordained it that we should learn to bear one another's burdens, for there is no one who has not some defect, no one without some burden, no one independent of others, no one wise enough of himself; but we ought to bear with one another, comfort one another, help, instruct, and advise one another. —Thomas A. Kempis.

## For Scalds Or Burns—Dr. Thomas' Electric Oil Is a Standard Remedy

For the prompt treatment of scalds and burns. Its healing power is quickly felt, soothes the pain and aids a speedy recovery from the injury. It is also an excellent remedy for all manner of cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. A bottle in the house and stable saves many a doctor's and veterinary's fee.

## Canada's Arctic Citizens

Over 7,000 Eskimos Living In Our Northern Hinterland

There are approximately 7,100 Eskimos in Arctic and sub-Arctic Canada, including Hudson Bay scattered in small groups, principally in the Arctic Islands and along the northern coast. Canadian Eskimos are progressive. The more advanced have, in their homes, sewing machines, gramophones and radio outlets. In the Mackenzie delta and along the western Arctic coast the ambition of the head of a family is to own a automobile, fitted with an auxiliary gasoline engine. At Aklayak during the summer as many as twenty-five of these schooners, all owned by natives, are frequently to be seen at one time.

As a vermicide an excellent preparation is Mother's Graves' Worm Exterminator. It has saved the lives of countless children.

## Origin Of The Sandwich

It seems that the spirit of the age is against tea. "I wouldn't dream of taking up time and space with all the paraphernalia of a tea table," says a very modern hostess; "We usually play bridge and a stop for tea would be a nuisance." So we are back again at the days when Mr. Lord Sandwich, too busy with gambling to bother about lunch, invented the snack which bears his name.

Hawaii has a new biscuit and bread plant which cost half a million dollars.

The Chinese government has placed an order for freight cars in Scotland.

## Nervous Indigestion

Troubled For Years, Mrs. John Machon Thanks Dr. Williams' Pink Pills for Permanent Relief

"For many years I had been troubled with indigestion and my nerves," writes Mrs. John Machon, Calumet, Minn. "I suffered constantly."

I tried many remedies, but without gaining any relief. I was unable to get any rest. I got a box of Dr. Williams' Pink Pills to give them a trial. I soon saw a great change. Now I can go to bed and have a good night's rest, and am able to do a day's work with any one. All I have to thank for it is Dr. Williams' Pink Pills. I would not be without them in the house."

Dr. Williams' Pink Pills are remarkably effective in the above, because they create new rich blood which supplies to the nerves the very elements they need. Equally effective for all run-down and anemic conditions. Try them. At your druggist's. 50c. a package.

## To Bring Back Prosperity

Only Way Is By Harder Work and Better Work

If we allow ourselves to believe that some intangible, mysterious thing called "recovery" is going to improve our lot without any assistance from ourselves we will soon lose the touch. We have had the instinct for laziness which is one of our racial disadvantages. The last three years have chastened the instinct for laziness which is one of our racial disadvantages. The last three years have driven the well-dressed idler into work or obscurity. The last three years have forced us to place sport and recreation generally in their proper relation to the stubborn realities of life. We cannot afford to abandon the stern discipline we have learned. Harder work and better work is the only way to reach the promised land of prosperity. By the sweat of our brow alone will good times come again.—Daily Express, London, England.

## Showered Great Vitality

Remarkable vitality was shown by a hen that was buried under a heap of garden and path cleanings at Palmerston North, New Zealand, for twenty-four days. A neighbor heard it cackling and found it after investigation. It was weak and emaciated, but made a good recovery.

There was a one-way street in Pompeii, the Italian city which was destroyed by the eruption of Mount Vesuvius in 79 A.D.

## DECLARE THEY HATE SIGHT OF DUST CLOTHS

Canadian women vote dust cloths a nuisance to use and wash

MUCH PREFER APPLEFORD WONDER PAPER

With so much inventive thought being given to eliminating unnecessary housework, it is not surprising that a washable substitute for the dusty dust cloth should be sought.

Now it has been found! Appleford Wonder Paper, which actually dusters—sifts clean—as it polishes is receiving a hearty welcome from Canadian women who detest dust cloths and all their stand-by, Wonder Paper is made from clean rag and soft paper pulp, thoroughly impregnated with a high-grade furniture polish, small grains of pumice, and a very fine Appleford Wonder Paper comes in handy-size packages, twenty-five sheets, each as large as a duster. You merely crumple a sheet into a soft pad, and go over the surfaces requiring attention.

You'll be amazed at the quick and lasting finish Wonder Paper gives. When one side is worn and soiled, simply turn the Wonder Paper inside out. After the furniture or woodwork has been gone over, you can still use your Wonder Paper on the floors.

And when you're through—throw it away. No dust to shake out or wash. No bother at all. The most obnoxious part of housework done in half the time and with half the effort. Doesn't the idea appeal to you?

## Special Offer

Wonder Paper is made by the makers of the famous PARASOL brand waxed paper in the Green Box. Most grocery, hardware and department stores sell Appleford Wonder Paper. If you don't, just send the coupon and we'll give you a new and unique booklet entitled "How to Duster," containing 100 recipes for "left-overs."

## Main Street

Mrs. W. H. King and Miss Brenda Ketchen were among the visitors to the city over the week end.

Don't forget the sale of Home Cooking and Afternoon Tea at Mrs. Pryce Jones, Saturday, May 28th from 3 to 5.30.

Mr. and Mrs. Frank G. Mapley of Postville, Michigan are visiting the Elliotts at Irma. Mrs. Mapley is a daughter of Mr. J. H. Elliott.

The Roseberry and Alma Mater Ladies Aid will meet on Thursday, May 26th at 2 p.m. at the home of Mrs. Stead.

Mr. Dyer of Edgerton is visiting his daughter Mrs. Korluk and looking after their place while Mr. Korluk is in hospital.

The Irma Rebekah Lodge No. 87 are having a Lawn Social on Wednesday afternoon, June 15th at the home of Mr. and Mrs. Martin Knudson. Everybody welcome.

Mr. and Mrs. James Fenton, Gordon and Miss Rena, also Mr. and Mrs. Martin Enger and daughter Joy motored to Thorby over last week end to visit their daughter and sister, Mr. and Mrs. Ralph Dunlop.

Tuesday, Dr. Greenberg took Mr. Geo. Horluk to Edmonton where he underwent an operation the following day. Mrs. Korluk and daughter accompanied them and returned home Friday.

Mr. Ambrose Fickus left Jarrow Monday evening for Almond, Wis. to attend the funeral of his only brother, Ray, whose death occurred in Napa, California, Saturday morning, May 14th.

Mr. J. J. Maloney will speak in Kiefer's Hall, Irma on Thursday, May 26th. If you have heard Mr. Maloney speak you will want to hear him again. If you have not heard him, do not miss this opportunity. Mr. Maloney is one of the outstanding orators in Canada today.

The flu seems to be going the rounds of Irma and district, among those we could mention who have been quite ill are Mr. and Mrs. Reeds, Mrs. Osterhout, Mrs. G. Higginson and Miss Elizabeth, Mrs. P. J. Harvy, Miss Eileen Gieson, Mrs. Schon, Stuart, Fenton, Mrs. Peter Hill and Mr. and Mrs. E. W. Carter and family.

Two car loads of members from the Irma L. O. B. A. were able to accept the invitation to meet with the Wainwright L.O.B.A. on Tuesday night of this week. Those who attended were: Mrs. Frickelton, Mrs. Carter, Mrs. Petal, Mrs. Yeend, Mrs. Glasgow, Mrs. Herbert, Mrs. Webb, Mr. and Mrs. Martin Enger, Mr. and Mrs. Eldon Fenton, and Mr. James Fenton. They all report a most enjoyable evening, and the ladies wish to thank Mr. Frickelton and Mr. James Fenton for their cars.

## CRESCENT HILL U.F.A. NEWS

Just a reminder to the friends around Crescent Hill that we hold our meetings the first Monday in every month at the Crescent Hill School. The next meeting will be held on June 6th. The business part starts at 8 o'clock but when this has been completed there always follows a treat in the form of a program and of course lunch. Now these evenings are of interest and helpful to all adults the women taking an active part as well as the men. The program part has consisted of talks and general discussion on farm topics, solos, orchestra numbers, duets by both men and women, also readings, etc. We always have practically full attendance of members, also some visitors, but we are extending an invitation for you to come and join us.

## CROP CONDITIONS IN ALBERTA

Up until the end of last week 37.2 per cent of wheat seeding had been completed in the province, according to reports received from Alberta Pool agents. In the northern portion of the province seeding has been considerably delayed by a late spring. In the southern and central divisions good progress has been made. The present week has been favorable for seeding all over the province and will see a considerable addition to the acreage already seeded. General conditions are good at present. Damage from cut worms and grasshoppers is threatened over a considerable area if a wet spring fails to materialize.

A school man at a schoolhouse in a neighboring town caught the janitor in a falsehood, and asked him where he thought he'd go in the next world if he told such stories. He replied that no matter where he went he expected he'd be making fires for school teachers.

## NOTICE TO CREDITORS

In the Estate of GROVER FRANKLIN ARNOLD late of the Post Office of Irma, in the Province of Alberta, Farmer, Deceased.

NOTICE is hereby given that all persons having claims upon the estate of the above named Grover Franklin Arnold who died on the 15th day of January A.D. 1932, are required to file with Mrs. Margery Arnold, Irma, Alberta, by the 2nd day of July, A.D. 1932, a full statement duly verified of their claims and of any securities held by them, and that after that date the executrix will distribute the assets of the deceased among the parties entitled thereto having regard only to the claims of which notice has been so filed or which have been brought to her knowledge.

Dated this 16th day of May A.D. 1932.  
CLIFTON G. PURVIS, Solicitor for Mrs. Margery Arnold, Executrix, Irma, Alta. 3tc.

## The Domestic Animals Act (Mun.)

SALE AND REDEMPTION OF IMPOUNDED ANIMALS (Sec. 48) Notice is hereby given under Section 48 of The Domestic Animals Act (Municipalities) that —

1 Black Colt Filly, white star on forehead, branded RT, 3 years old.  
1 Black Colt Filly, star on forehead, some white on hind feet, 4 years old, no visible brand, about 1000 lbs.  
1 Brown Colt, 2 year old filly, about 850 lbs., no visible brand; were impounded in the pound kept by R. Heaton, located on the S.E. 32-45-7-with on Thursday, the 31st day of March, A.D. 1932, and that said animal was sold on the 14th day of April, 1932, to Jules Bamalis of Wainwright, — and that said animals may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchaser of said animals.

Chas. Wilbraham, Sec. Treas. M. D. of Battle River, Post Office, Irma.

## IN MEMORY

Of Luella Terrin who died at Wainwright Hospital, May 11th, 1932.  
Why is the home so lonely?  
Why are the days so long?  
And why this feeling of sadness?  
It is that Luella is gone:  
She left in the early morning  
His heavenly crown to win  
Just as the angels whisper  
Beautiful soul come in.  
She was gentle, patient and loving  
Her lips ne'er a harsh word spoke  
And seeing them closed forever  
No wonder our hearts are nigh broke  
Ah death, why enter our circle  
To take the one we all loved  
And leave us to fight this sad battle  
For the loss of the one we all loved.  
Yet we cannot feel as though we have lost you,  
But just that you were as before;  
You will always be fondly remembered,  
Sweet memories will cling to your name  
Those who loved in life so sincerely  
Love you in death just the same.

## CARD OF THANKS

Mrs. Terrin and family wish to thank their many friends and neighbors for their kind help and sympathy during their recent sad bereavement.

## NEW RAIL TIRE PROVES BIG SUCCESS

Firestone, pioneer of the balloon tire which played such an important part in automotive development during the past nine years has made another major contribution to transportation in the form of a new pneumatic rail tire which established a record on its first trial. This amazing new tire developed after months of research by the Firestone Development Laboratories in an effort to perfect tired wheels for safe, comfortable, noiseless travel over rails, which traffic experts believe will have important bearing on rail transportation.

Equipped with wheels flanged like those of a railroad car and with the new rail tire a heavy seven passenger sedan travelling on rails set a new rail record from Miami to Jacksonville, travelling 406 miles in 378 minutes at a rate of 64.39 miles per hour with all stops included. Deducting 31 minutes for stops, the actual running time average was 70.2 miles per hour.

Clifford D. Smith, Manager of the Firestone Development Laboratories, piloted the car on its record-breaking run and was warmly congratulated by Mr. Firestone for the wonderful achievement.

At the end of the 405.7 mile run, a close check of the tires showed no perceptible wear, and less heating than would have been evident in driving the same car over the highway. The tires behaved perfectly throughout the trip, running without heating at a maximum speed of 87.3 miles an hour.

Progress through the remote wilds of the Everglades was made so quietly and as such speed that the car would be in the middle of a flock of buzzards, heron, ducks or cranes before the birds were aware of it. Early spectators, unaware that the record run was to be made, gaped open-

mouthed at the spectacle of a seven-passenger automobile tearing along the rails at better than seventy miles an hour.

Despite the high speed, the occupants made their notes and entered figures in the log books with perfect ease while gliding along at 75 and 80 miles an hour — with ease impossible in an automobile making 30 miles an hour on the highway or a train travelling at 60. It was almost as fast as airplane travel, but infinitely more quiet and comfortable. Passengers were able to talk in ordinary conversational tones.

Elated with the accomplishment of the Firestone pneumatic tired rail car, Harvey S. Firestone declared it was a definite step in the progress of advanced and comfortable transportation. "Hundreds of miles of railroad tracks unused today will be put in use again through the development of this tire," Mr. Firestone said. "Smaller units of transportation which will permit railroads to operate many lines now out of commission will be a direct result of this new pneumatic tired wheel. It will bring a new speed and comfort in rail travel."

## FARM YOUNG PEOPLE'S WEEK JUNE 2nd to 6th.

Between 150 and 300 farm boys and girls have been spending a week at the University in June every year since 1918. Many of these boys and girls who visited the University for the first time at a Farm Young People's Conference, have returned to take the regular degree courses later on. Others have established a contact with the University which has proven very valuable to them in their farming occupation.

Into one short week is crowded a wealth of new experiences, inspiration, education and good fellowship. It will be well worth while to spend the week of June 2nd to 6th at the University.
